

Description

Plastic shims for assembly and adjustment of prefabricated parts. Made of high-quality plastic. Not suitable for permanent load.

Application

The plastic shims should be loaded over the entire surface and not at specific points when assembling or adjusting prefabricated parts. Despite the high stability, no permanent loads may occur. After adjusting the precast elements, they must be shimmed. The usability of the product in the respective installation situation must be checked by the user!

Material

- Polyethylene (PE)
- Free from PVC, CFC and HFC
- Without substances of very high concern according to ECHA candidate list (REACH Regulation)

Packaging

- Free of halogen-containing compounds, azo dyes, flame retardants

The plastic shims are available in different colours on request for better differentiation of the thicknesses. This makes it easier to select the correct thickness and reduces the risk of confusion.

Note: Protect from direct sunlight during storage.
